

If you don't know where you are going, **no road** will get you there

For this reason, we know what we are striving for

PiBery is a promising project, so the technology must meet expectations.

What do we need?

We need an app as

fast as a Bugatti

- **Dart** is a client-optimized language for fast apps on any platform!

beautiful like Aston Martin

- **Flater** framework allows you to create beautiful applications with Flutter's collection of visual, structural, platform, and interactive widgets

innovative like Tesla

- **ASP.NET Core** is a cross-platform, high-performance framework for building modern, cloud-enabled, Internet-connected apps.

Technologies stack

PiBery

Frontend

Dart

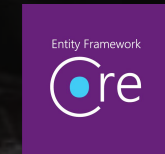

Flutter

Backend

.NET Core 3.1

Entity Framework Core

Database

MS SQL Server
